# Zenbooth Quad Mounting Instructions

---

---

## INTRODUCTION

---

Dear valued customer,

This guide is intended to help you mount anything you need to a Zenbooth Quad. Due to its double walls and wood based construction, Zenbooths are extremely adaptable. Mounting monitors, work surfaces, white boards or other devices is as simple as screwing it to the wall! This guide if followed, will ensure that you do not damage any of the sensitive equipment inside the wall and ensure that what you are mounting to your Quad stays on the wall for years to come.

Throughout this guide we have detailed shaded zones where it is safe to mount and what the weight limits of those zones are. Thank you for modifying your Zenbooth Quad and good luck on your mounting projects.

Sincerely,

🌱 The Zenbooth Team 🌱

## // TOOLS & HARDWARE NEEDED

---

Drill

Tape Measure

$\frac{1}{8}$ " Drill Bit

$1\frac{1}{2}$ " Wood Screw  
Fully Threaded

# MOUNTING INSTRUCTIONS

Zenbooths can accept after market hardware and mountable devices and it's as easy as drilling a hole and mounting the object to the wall. There are however a couple things to remember when mounting anything to a Zenbooth. Always follow the manufacturer's instructions for mounting any item you wish to mount. Always remember to check that any provided screws are  $1\frac{1}{2}$ " in length.

## Step 01

Measure  
-  
Measure from a corner

## Step 02

Pre-Drill  
-  
Drill through felt when needed.

## Step 03

Mount Your Hardware  
-  
Using  $1\frac{1}{2}$ " wood screws
